Gambrills, MD 21054

410-721-0800

Your insurance carrier does not reimburse for vision screening, in our office. They recommend you receive these vision screening services through your carrier's vision specialists. We recommend screening children before entry to school and at age 8 and 12 (the two genetic peaks for decreased visual acuity). Your child's school sometimes offers these services. They do a perfectly adequate job of screening.

The charge, in our office, for this screening is **\$25.00**. BelliAcres Pediatrics

Pt. Name _____ Date _____

_____ Please, screen my child for vision problems. I understand that I will be responsible for the **\$25.00** fee.

_____ I understand that vision screening is an important preventative service for my child and I choose to seek these services elsewhere.
